

Math 180 Parent Portal

As your child begins using the Math 180 program at school, we encourage you to talk with him or her about their experience.

Please use the resources below for assistance:

<http://math180.com>

Growth Mindset Tips: It is the belief that intelligence and abilities can be developed through dedication and work.

- Give growth mindset feedback (Praise the effort involved in a task)
- Talk about the value of mistakes as learning opportunities (Learn from your mistakes to improve)
- Teach your child to recognize a “fixed mindset voice” and replace it with a “growth mindset voice.” (Fixed: I give up Growth: I will try)
- Ask questions to help your child think and solve problems for himself or herself. (Assist through the process rather than giving the answer)
- Be a growth mindset role model (Share your efforts in working through challenging tasks)
